DETAILED ACTION

This office action is in response to the amendment filed August 18, 2006.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12, 17, 18, 21, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barney, U. S. Patent 3,436,888 in view of Parks, U. S. Parks 4,538,430.

3. Barney teaches a collar having an outer display surface adapted to receive a slip of paper having indicia thereon. The collar also has an upper portion with an upper lip B and a lower portion with a lower lip B defining a slot formed there-between for receiving the slip of paper C. Barney does not teach the collar having a spacer.

4. Parks teaches a collar/ring 15 having a spacer 10 to adjusting the interior diameter to be placed on objects such as fingers with various sizes.

5. It would have been obvious to one having ordinary skill in the art at the this invention was made to construct the collar/ring taught by Barney with a spacer as taught by Parks to provide a means to adjust the interior diameter or size of the ring/collar.

Allowable Subject Matter

6. Claim 18 is allowed.

7. Claims 22, 24, and 25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments filed August 18, 2006 have been fully considered but they are not persuasive. The applicant argues that there is not a suggestion or motivation to combine the Barney and Parks reference. In addition, the applicant argues since a napkin is flexible article, the dimension are easily adjusted to fit the interior diameter of a napkin ring of the type described in Barney. The examiner disagrees. Both Barney and Parks teaches a ring, wherein Part further teaches a means to adjust the interior diameter of the ring.
